Learning the **e** way

Introduction

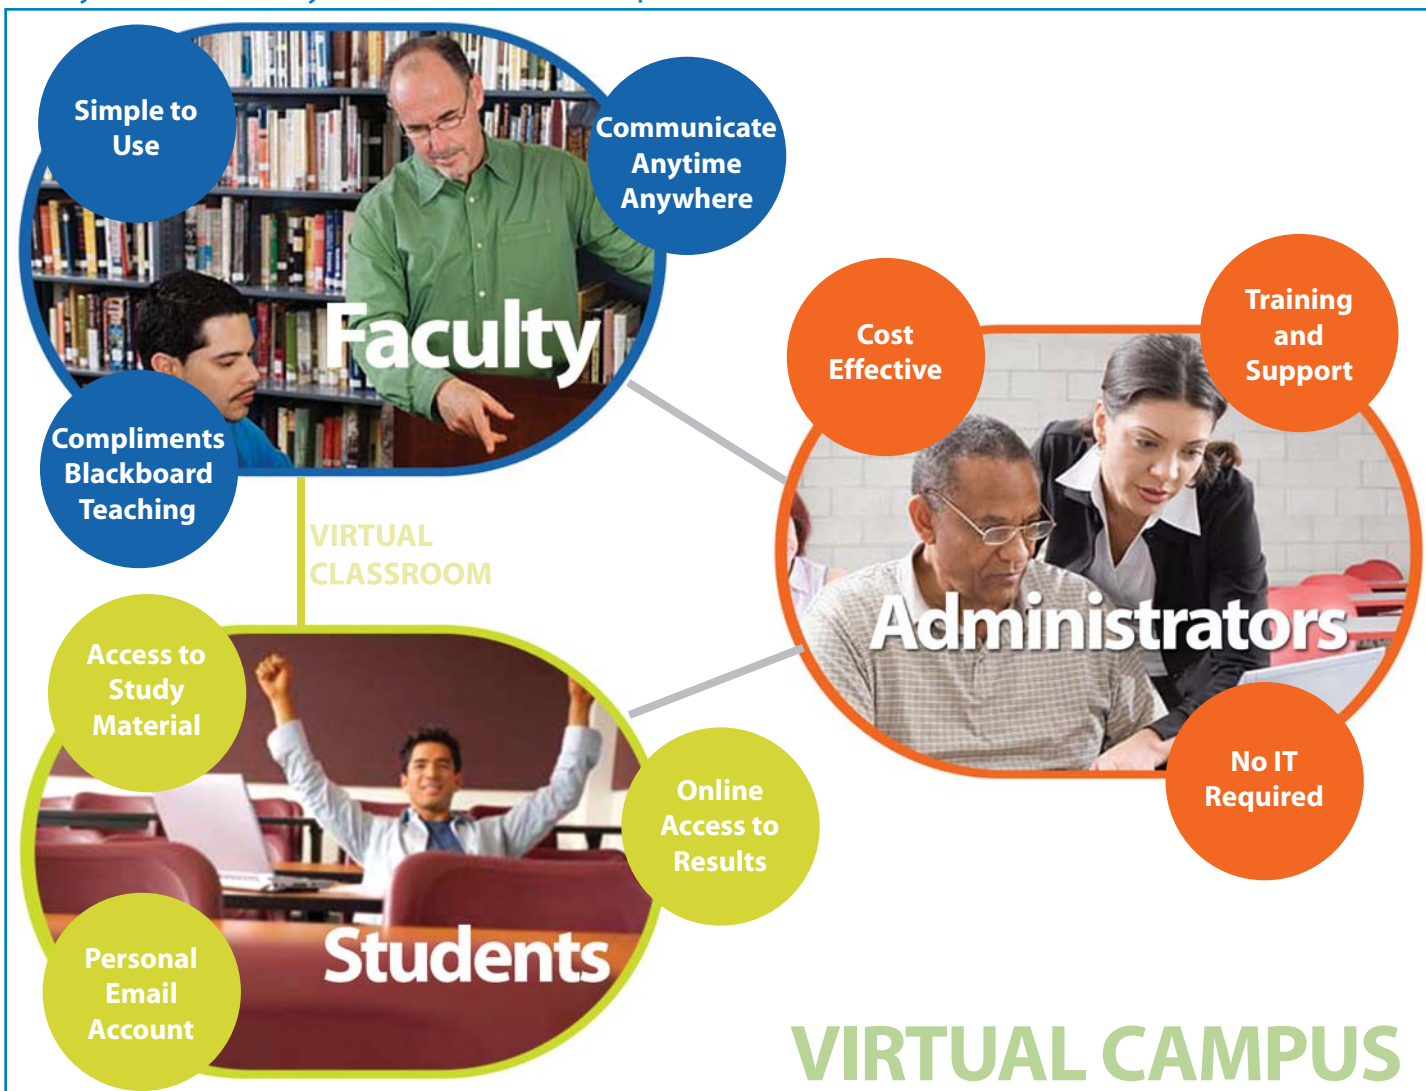

Increasingly academic institutions are incorporating online technology to dramatically enhance the quality of their classrooms and the overall caliber of their institutions. Institution leaders readily recognize the added value of technology to complement a beautiful campus and an acclaimed faculty. Prestigious universities across the globe now compete for titles such as "most wired" and "most innovative users of technology". Tekege Solutions presents **e**backpack, an online campus tailored to the unique needs of your institution.

What is **e**backpack?

ebackpack is an easy to use online campus that extends your institution beyond its walls, bringing the faculty, students, administrators and parents closer than ever before.

Why does everyone love **e**backpack ?

What are the features of ebackpack?

The Virtual Classroom

 **Classroom Announcements:** A space for classroom specific announcements, informing students of when a faculty uploads a new assignment, adds a new test or makes any modification to an existing document.

 **Syllabus:** A feature where instructors make the class syllabus and timelines available. Students will automatically be notified if the instructor makes any changes to these documents.

 **Assignments:** A secure space where faculty uploads assignments for which students can directly submit their responses.

 **Results:** A single confidential space where assignments and exam results can be uploaded by faculty and viewed by the respective student.

 **Attendance:** The attendance section allows instructors to mark attendance online, and students to view their own attendance records. The instructor can also download the attendance into an excel worksheet, so that they can be submitted to the college.

 **Course Documents:** A single place where all supplemental course documents are available, such as reading lists, presentations, assignment answer keys, exam preparation materials and examples of student's work.

 **SMS:** A way in which faculties and administrator can send out SMS's when required.

The Virtual Campus

 **Campus Announcements:** An online notice board for announcements relevant to the entire campus community, such as unscheduled holidays, new faculty and new campus-wide procedures.

 **Campus Documents:** A central place for the institute to place useful documents such as forms, prospectuses and brochures.

 **Campus Calendar:** A calendar that keeps everyone on campus informed of exams, holidays and other important events.

 **Campus Directory:** A central directory provides phone numbers, extensions, email ids and office hours. This feature allows users to control their own information and keep it updated.

 **Email:** Every student, faculty and administrator gets a reliable and secure personal email account with the university domain name (facultyname@university.edu.in)

Future ebackpack Enhancements

Alumni Network: ebackpack will soon host an alumni feature where former students can communicate amongst each other, teachers and administrators.

Parent Access: ebackpack will soon have a section that provide parents with limited access to their children's assignments and grades.

Library Management: ebackpack will soon be releasing a library management module which integrates the school library into ebackpack, allowing students and faculty to search for books online. Eventually, libraries of all ebackpack campuses can be integrated.

Career Board: ebackpack will soon offer a career board informing students of upcoming career fairs, internships, jobs and access to expert career counselors.

What are the advantages of **e**backpack?

Cost Effective: **e**backpack is the most affordable quality Learning Management System available to you on the market today.

Reliable: **e**backpack servers are hosted in a data center with fully redundant network and state of the art backup procedures and equipment.

Fully Managed Services: **e**backpack offers a 24 hours helpdesk managed by a world class support team to cater to all your technical support issues.

Expandable: **e**backpack is designed to incorporate new modules developed by the R&D department based on user feedback.

Scalable: **e**backpack is designed to incorporate your expansion plans. You can add thousands of users anytime.

What are the technical highlights of **e**backpack?

- 99% application availability guaranteed
- Around the clock customer support
- 15 days application setup and installation
- An initial 10 GB to 20 GB storage space (additional as required)
- An initial 256 Kbps of bandwidth (additional as required)
- Daily data backup
- Weekly tape backup
- Secure facilities
- Firewall protection
- Redundant internet connections
- Fully redundant and air-conditioned power

I want **e**backpack for my institution. How do I get started?

- All you need is to have internet access
- Provide **e**backpack with a list of classes and students
